

Community Feedback Form 2023-24

Extension Activity by NSS, NCC, and Eco Club ✓

Section 1: General Information

1. Name (Optional): Mr. Hem Raj
2. Age Group:
 - Below 18
 - 18-30
 - 31-50
 - Above 50
3. Gender:
 - Male
 - Female
 - Other
4. Occupation: _____
5. How did you learn about this activity?
 - Announcement
 - Social Media
 - Through Volunteers
 - Other (Specify): _____

Section 2: Relevance of the Activity

1. What was the focus of the activity?
 - Environmental Conservation
 - Health and Hygiene Awareness
 - Cleanliness Drive
 - Tree Plantation
 - Other (Specify): _____
2. Was this activity relevant to the needs of your community?
 - Yes
 - No
 - Partially
3. What was the most beneficial part of the activity for your community?
 - Awareness creation (talks, presentations, etc.)
 - On-ground action (cleaning, planting, etc.)
 - Skill-building or training

4. Did the activity address any critical issues in your community?

- Yes, completely
- Partially
- Not really

Section 3: Impact Assessment

1. How would you rate the activity's impact on the community?

(Scale: 1 = No Impact, 5 = Major Impact)

- 1 2 3 4 5

2. What changes or improvements did you observe after the activity?

- Cleaner environment
- Greater community awareness
- Increased participation in local initiatives
- Other (Specify): _____

3. Did the activity inspire you or others in the community to take action?

- Yes
- No
- Not Sure

4. Would you support or participate in similar activities in the future?

- Yes
- No

Section 4: Suggestions and Feedback

1. What improvements would you suggest for such activities?

- Need more on ground implementation

2. What other issues should NSS, NCC, and the Eco Club focus on in your community?

- Water conservation
- Waste management
- Health and hygiene
- Other (Specify): _____

3. Any additional comments or feedback:

- Government should initiate more policies and plans for waste managements.

Plastic Waste Collection and Awareness Drive by Eco Club, RKMV College

The Eco Club of RKMV College has undertaken a commendable initiative to address plastic waste issues in Shimla city. Students of the club actively collected plastic milk packets and single-use plastic from their homes and surrounding communities, engaging over 500 families each month in this endeavor.

Activities Conducted:

1. Plastic Waste Collection:

- Students collected clean and dried plastic milk packets and single-use plastic from households and communities.
- Monthly collections exceeded contributions from 500 families in Shimla city.

2. Community Engagement and Awareness:

- Students conducted awareness drives to educate residents about the environmental hazards of plastic waste and the importance of its proper disposal.
- Feedback was solicited from residents to understand their perspective and suggestions for addressing plastic waste issues.

3. Safe Disposal:

- Collected plastic waste was handed over to the Municipal Corporation (MC) Shimla for safe and environmentally friendly disposal.

Feedback from Residents:

- Understanding and Support: Most residents expressed their understanding of the plastic waste problem and appreciated the efforts of the students.
- Policy Recommendations: Several residents suggested that the government introduce stricter policies and better infrastructure for plastic waste collection and recycling.
- Continued Collaboration: Many families showed eagerness to continue supporting the initiative, emphasizing the need for such drives to be regular and widespread.

Impact and Outcomes:

- Increased awareness among Shimla's residents about the environmental impact of plastic waste.
- Successful mobilization of the community in the collection of significant amounts of plastic waste.
- Strengthened collaboration between RKMV College and MC Shimla for the effective disposal of collected plastic.

This initiative reflects the commitment of RKMV College's Eco Club towards sustainable waste management and community-driven environmental conservation. Such efforts set a benchmark for other institutions to follow in addressing pressing ecological challenges.

Report on Survey Feedback: Community Services and Cleanliness Drive Organized by NSS Unit, RKMV Shimla (Session 2023-24)

Introduction:

The National Service Scheme (NSS) Unit of RKMV Shimla undertook a community service and cleanliness drive during the session 2023-24. As part of this initiative, a survey was conducted to assess the impact and effectiveness of these activities in the community. The survey aimed to gather feedback from individuals in areas where the activities were conducted, with a focus on community engagement, cleanliness awareness, and waste management practices. A total of 100 questionnaires were collected from the local community for this survey.

Key Findings:

1. Impact of NSS Volunteers' Services:

- The survey revealed that the NSS volunteers from RKMV Shimla were widely appreciated for their exceptional services in promoting cleanliness and raising awareness about waste management. Respondents praised the enthusiasm, dedication, and involvement of the volunteers in the various community service activities.
- A significant number of respondents expressed their gratitude for the volunteers' efforts in improving the local environment and encouraging people to adopt cleaner and more sustainable habits.

2. Community Awareness on Cleanliness:

- The majority of respondents indicated that they were more aware of the importance of cleanliness and waste management as a result of the NSS activities. Awareness programs, clean-up drives, and educational sessions conducted by the volunteers contributed significantly to changing people's attitudes toward maintaining a cleaner environment.
- Some respondents specifically noted that the cleanliness drive helped in reducing littering in public areas and increased the sense of responsibility among local residents.

3. Suggestions for Improvement:

- **Compulsory Participation:** One of the recurring suggestions in the survey was that the community service and cleanliness drives should be made compulsory for all students, as well as other stakeholders such as local businesses and government representatives. Respondents felt that mandatory participation would increase the impact and ensure that the initiatives reach a wider audience.
- **Waste Management Systems:** There were several suggestions related to improving waste management practices in the community. Respondents recommended better waste segregation, more accessible waste disposal bins, and the introduction of recycling programs. Some expressed a desire for regular waste management training sessions for residents, particularly focusing on segregating organic and non-organic waste.
- **Health and Hygiene:** Many respondents highlighted the need for ongoing educational programs to improve health and hygiene practices in the community.

Suggestions included the organization of workshops on sanitation, personal hygiene, and safe waste disposal.

- **Government Policy Recommendations:** A number of survey participants suggested that there should be stronger government policies to enforce cleanliness and waste management practices. They called for more stringent regulations, including penalties for littering, and the establishment of clear guidelines for waste disposal.

4. Role of NSS in Community Development:

- Respondents widely acknowledged the role of NSS in fostering community development and environmental consciousness. The volunteers' engagement was seen as an important catalyst in promoting social responsibility among the younger generation. The initiative was lauded for its long-term impact on both the local environment and the mindset of community members.

5. Future Initiatives:

- Many respondents expressed interest in seeing the continuation of such drives and suggested that similar programs should be organized more frequently.

Conclusion:

The survey results highlight the positive impact of the community services and cleanliness drive organized by the NSS Unit of RKMV Shimla during the 2023-24 session. The NSS volunteers have made a significant contribution toward improving cleanliness, raising awareness about waste management, and fostering a sense of civic responsibility in the community. However, the survey also suggests areas for improvement, including making such initiatives compulsory for all students and stakeholders, strengthening waste management systems, and implementing more stringent government policies on cleanliness.

Overall, the feedback demonstrates that the NSS Unit's efforts are highly valued, and there is considerable support for expanding these activities to further improve community engagement and environmental stewardship.

The "Report of Cleanliness Drive" by the NCC

The "Report of Cleanliness Drive" by the NCC wing of RKMV Shimla is well-documented, highlighting the significant contribution of cadets towards environmental cleanliness. The detailed description of the cleaning process and the initiative to educate the locals about water conservation is commendable.

Suggestions for Improvement:

1. **Clarity in Language:** Consider refining some sentences to enhance readability. For example, "Whole water is drained" could be rephrased as "The entire water source was drained."
2. **Data Inclusion:** Adding specifics like the duration of the drive or the quantity of waste removed can give a clearer perspective on the effort.
3. **Visuals:** Including photographs of the activity could make the report more engaging and impactful.
4. **Impact Assessment:** Mentioning any feedback from the local community or changes observed after the drive would enrich the report.

Overall, this initiative reflects a strong commitment to sustainability and environmental awareness. Excellent work!
